

KRYPTON LAMPS are filled with krypton gas which allows for the filament to burn at a higher temperature. As a result Krypton lamps produce a higher light output than equivalent regular argon gas filled lamps. Since less power is required to produce the same amount of light, the Krypton lamps are energy efficient with savings up to 15 % compared to regular lamps.

DAYLIGHT LAMPS produce a crisp white light that simulate natural sunlight. These lamps are specially designed to provide whiter natural light enhancing surrounding colours.
